

Corrosion Equipment Division (CED)

— Engineered Products —

Engineered Solutions Addressing Corrosion Problems

Corrosion costs industry billions of dollars a year. Our **Corrosion Equipment Division** offers engineered products to solve these concerns for your applications.

Our Products Give You Excellent Corrosion & Wear Protection Against:

- Acids
- Caustics
- Corrosive Sludges & Slurries
- High Chlorides
- Brines & Salt Waters
- Solvents
- Pickle Liquors
- Deionized/Demineralized Water
- Condensate Return
- Chilled/Hot Water
- River/Make-Up Water
- Wastewaters
- Potables
- Vented Fumes

Product Benefits:

- Corrosion Resistant Inside & Outside
- Lightweight/High Strength
- Durable
- High Flows
- Ease Fabrication/Installation
- Low Maintenance
- Long Service Life
- Full Product Support

Services:

- Training & Educational Seminars
- Field/Site Supervision
- Field/Site Fabrication
- CAD Capabilities
- Shop Fabrications
- Local Inventory

Smith Fibercast —

The world leader in FRP piping systems for over 60 years. 1–84" diameter in Epoxy and Vinyl Ester resins. Our piping systems are available from five manufacturing facilities in North America. Local inventory and training to support your requirements.

Power Pipe and Plastics — (PPP)

Manufactures and fabricates custom FRP piping and piping liner systems, tanks and tank liners, trench and trench-liners and special geometries for the most demanding applications. **PPP** is experienced in the latest resin and reinforcement technologies. Field Services and Supervision offered for successful project installations.

Advanced Fiberglass Technologies — (AFT)

Manufactures tanks of various resin systems, reinforcement to 24' diameters to your specifications. Located in Wisconsin, **AFT** can furnish field erection services throughout North America. Special requirements for internals or engineered accessories are available from their experienced engineering capabilities.

Fusibond —

Offers the most liner systems in the plastic lined pipe industry, including High Density Polyethylene, Polypropylene, ECTFE, PTFE, PVDF, ETFE, MPFA and PFA. Local inventory and fabrication capabilities for easy "Bolt-up" installations.

Versa-Grate —

Manufactures and fabricates molded and poltruded FRP grating for various corrosion applications. Stair-tread, Handrail systems and Platforms are available for "Bolt-up" in the field.

Intertec —

Complete line of fiberglass heated instrumentation enclosures, safety showers and shelters. Standard and custom sizes with color options. Accessories include steam or electric heat, R-factor insulation, fans, and installation of products for complete drop in packages .

& Start-up Services.

70,000 Sq. Ft. Facility

Monessen, PA

Nilcor —

Corrosion-resistant, composite valves — ball, butterfly, checks, ceramic, automated control valves

Flowserve/Atomac —

Lined ball valves and accessories

Flowserve/Durco —

Lined butterfly, plug valves and accessories

Flowserve —

T-Lined strainers and PFA lined swing check valves

GIE —

Lined diaphragm valves 1/2–12", Weir or straightaway flow pattern. Lined full port ball valves 1/2–6"

Leser —

PTFE lined safety relief valves —
Type 447 (1–4", 150#, 1.5–235 PSIG)

Durlam —

FRP, Derakane 470 Conservation vents & accessories

Xomox/Tuflin —

Lined ball, butterfly, plug valves and accessories

Actuators —

Automax, Bettis, El-O-Matic, FieldQ, Matrix and Worcester

Automation Accessories —

Topworx and ASCO
