

VAC

Valve Actuation Center

VAC – Valve Automation

By using **ICE & ECI's** broad product line offering and inventory of valves and actuators, our specially trained automation technicians can insure you of a quality automated valve package. Using ICE & ECI's inventory, **your own equipment, or purchasing through your negotiated contracts**, our automation technicians will respond quickly and professionally to satisfy your VAC requirements.

In addition to valves and actuators, our knowledgeable staff can often suggest modifications, materials or accessories to enhance your process productivity. Our VAC personnel are fully supported by our authorized product manufacturers and our own engineering staff.

A fully Integrated quarter-turn, multi-turn, and linear automation facility.

Our 36,000 square feet Monessen, Pennsylvania facility.
Emergency automation service available seven days a week, twenty four hours a day.

VAC

Dedicated Technical Outside and Inside Sales Representatives are available to support customer requests for product quotations, application assistance, valve actuator sizing, and any other technical questions. Our full range of capabilities include:

- Testing and calibration of all automation packages, with documentation showing the performance of each assembly.
- Serialization process for each automated package including a permanent identification tag.
- Programs to develop standardized plant specifications to ensure lower procurement, maintenance and inventory costs.
- Complete engineering documentation for installation and operating manuals.
- Assistance with on-site valve and instrumentation applications.

Demonstration and training of automation products at customer locations, or at our training centers.
